

MAYTAS - Lending its expertise to Further the Green Revolution

Podagada Earth Dam

Narmada Main canal

Kovvada Kalava Spillway

For over Two decades now Maytas has been actively involved in creating irrigation infrastructure for the country. From dams to canals to barrages Maytas has undertaken projects that have benefited the farmer and consequently the economy, by ensuring that projects followed strict quality guidelines and were executed in time.

The Company has been one of the forerunners in the field of infrastructure development in the areas of irrigation, transportation, energy, housing and township development. Adjudged as 'Fastest Growing Construction Company' in India by National Academy of Construction during 2002-2003, Maytas is very much a part of the revolution of building a 21st century prosperous India.
